

State Spending – Searchable Database of Expenditures: Search State Government and University System expenditures by vendor, business unit, account, fund and job title.

WELCOME to the State of North Dakota Transparency website. This site was established by the 2009 Legislative Assembly, North Dakota Century Code 54-44.1-18, Searchable Database of Expenditures, and provides a single point of reference to view State and University System expenditures from July 1, 2007 to current.

The Bank of North Dakota, Mill & Elevator, Roughrider Industries and Housing & Finance are not included in the searchable database. These agencies have unique accounting requirements and use accounting systems other than the state's PeopleSoft system. Searches are based on PeopleSoft's chart of accounts so they were not incorporated into the searchable database.

Data is updated on a monthly basis, usually around the middle of the month for the fiscal period just ended. The exception to this is the month of June. Since June 30th is the State's fiscal year end, it will not be added to the database until the very end of July.
