

Computer Information Systems

The following matrix indicates those courses deemed transferable among institutions listed across the top of the matrix. The numbers on the matrix represent the number of semester hours associated with the course at each institution and which institutions have agreed to transfer the commonly numbered course in each row.

You can view the group leaders at the bottom of the page. If you are interested in printing this page, please note that it is best to print in landscape mode.

Prefix	Number	Gerta	Course Title	BSC	LRSC	NDSCS	WSC	DCB	VCSU	UTTC	SBC	TMCC
CIS	101	ND:COMPSC	Computer Literacy		2	2				2		
CIS	102		Computer Software Applications-Word	3			2					
CIS	104		Microcomputer Database	3	3	3	3	3				3

Prefix	Number	Gerta	Course Title	BSC	LRSC	NDSCS	WSC	DCB	VCSU	UTTC	SBC	TMCC
CIS	241		Introduction to Digital Forensics	3	3	3	3					
CIS	244		Web Server Management			4						
CIS	250		Advanced Web Design	3	3		3					
CIS	251		CIW Site Design	3								
CIS	252		XML	3								
CIS	253		PHP	3								
CIS	254		CIW E-commerce Strategies and Practices	3								
CIS	267		Intermediate Networking I	4	3	4	3	3		4		3
CIS	268		Intermediate Networking II	4	3	4	3	3		4		3
CIS	269/369		Enterprise Systems		3			3	3			3
CIS	270		Building Scalable Internetworks	5								
CIS	271		Implementing Secure Converged WANs	4								
CIS	272		Building Multilayer Switched Networks	4								
CIS	273		Optimizing Converged Networks	3								
CIS	281/381		Project Management		3			3	3			3
CIS	284		Incident Response and Disaster Recovery		3							

CIS 101 Computer Literacy

CIS 102 Computer Software Applications-Word

CIS 104 Microcomputer Database

CIS 105 Microcomputer Spreadsheet

CIS 115 Internet

CIS 128 Microcomputer Hardware I

Students learn the functionality of hardware and software components as well as suggested best practices in maintenance and safety issues. The students, through hands-on activities and labs will:

Learn to assemble and configure a computer
Install operating systems and software
Troubleshoot hardware and software problems.

In addition, this course helps students prepare for the CompTIA A+ certification.

CIS 129 Microcomputer Hardware II

Students learn the functionality of hardware and software components as well as suggested best practices in maintenance and safety issues. The students, through hands-on activities and labs will:

Learn to assemble and configure a computer
Install operating systems and software
Troubleshoot hardware and software problems.

In addition, this course helps students prepare for the CompTIA A+ certification.

CIS 130 Presentations

CIS 151 CIW Web Foundations

Students will learn how to create and manage their own Web pages using Hypertext Markup Language (HTML), Extensible HTML (XHTML), and CSS. Students will learn to write code manually, as well as use graphical user interface (GUI) authoring tools. Students will further learn the importance of marketing and implementing fundamentals design concepts along with validating their HTML or XHTML code. Other concepts covered include the tasks involved in various

Information Technology (IT) job roles, Internet connection methods, Internet protocols, the Domain Name System (DNS), URLs, customization of Web browsers, plug-ins, e-mail, search engines, security and project management. Course prepares students to write the Internet Business and Site Development Foundations modules of the CIW Foundations exam. These two CIW exam modules are required and students will be assessed an exam fee. The third and final module of the CIW Foundations exam, Network Technology Foundations, will be written in CIS221 Networking Essentials.

CIS 152 Cascading Style Sheets

Students will learn how to format Web pages using Cascading Style Sheets (CSS). Concepts covered are the anatomy of a CSS rule, inline, embedded and external style use, contextual selectors, classes, ids, pseudo-classes, font and text properties, style inheritance, the box model, and basic and advanced page layout. *Prereq: CIS151 CIW Web Foundations.

CIS 164 Networking Fundamentals I

This course focuses on the following:

Network terminology and protocols

Local Area Networks (LANs)

Wide Area Networks (WANs)

Open System Interconnection

(OSI) models

Cabling

Cabling tools

Routers

Router programming

Ethernet

Internet Protocol (IP) addressing

Network standards.

The first of four courses leading to the Cisco Certified Network Associate (CCNA) certifications.

Participants completing Levels 1-3 prepare to take the industry certification exam and become a Certified CISCO Networking Associate.

CIS 165 Networking Fundamentals II

This course focuses on the following:

Initial router configuration

Cisco IOS Software management

Routing protocol configuration

TCP/IP

Access control lists (ACLs).

Students will develop skills in configuring a router, managing Cisco IOS Software, configuring routing protocols, and creating access lists that control access to a router. The second of four courses leading to the Cisco Certified Network Associate (CCNA) certification. Prerequisite: CIS 265.

CIS 180 Creating Web Pages

The learner will create basic web sites by manually writing HTML/XHTML and Cascading Style Sheets (CSS) using a text editor. The student will learn the fundamentals of site layout and design, and how to upload completed web sites to a remote server. Other skills used include critical thinking by solving problems with coding syntax and viewing websites "live" on the World Wide Web.

CIS 181 Creating Web Pages II

Students create web sites using a current version of a graphical user interface (GUI) web authoring tool. Prerequisite: CIS 180.

CIS 202 Advanced Software Applications

CIS 208 Database Programming

CIS 212 Microsoft Windows Operating System Client

The course helps learners to gain the knowledge and skills to install, configure, customize, optimize, and troubleshoot the Microsoft Windows operating system in a stand-alone and network environment.

CIS 215 Implementing a Microsoft Windows Server Environment

This course introduces the learner to the Microsoft Windows Server and the networking technologies it supports. The learner will become familiar with networking and operating system concepts and the common tasks required to administer and support the Microsoft Windows operating system in a network environment.

CIS 216 Implementing a Microsoft Windows Network Infrastructure

This course is for professionals who will be responsible for configuring, managing, and troubleshooting a network infrastructure that uses the Microsoft Windows Server products. These tasks include the following:

Implementing routing

Implementing, managing, and maintaining Dynamic Host Configuration Protocol (DHCP)

Domain Name System (DNS)

Windows Internet Name Service (WINS)

Implementing a network access infrastructure by configuring the connections for remote access clients.

CIS 218 Planning a Network Infrastructure

This course is for professionals who will be responsible for installing, configuring, managing, and supporting the primary networking services in the Microsoft Windows Server operating system.

These core networking services include:

Domain Name System (DNS)

Windows Internet Naming Service (WINS)

Routing and Remote Access Service (RRAS)

Network security technologies

CIS 220 Operating Systems - UNIX

CIS 221/321 Networking Essentials

Introduces students to the concepts and terminology of data communications, local area and wide area networks, communications hardware, standards, media, signaling concepts, data communication, error prevention, detection and correction. Course prepares students to write the Network Technology Foundation section of the CIW Foundations exam. This CIW exam section is required and students will be assessed an exam fee. Final grade is not based on whether student passes or fails certification.

CIS 222 NetWare Administration ()

CIS 229/329 Information Systems Management

CIS 230 Electronic Publishing

CIS 231 Search Engine Optimization

CIS 232 Graphics Design

Students will learn how to design graphics and page layouts using Adobe Photoshop.

CIS 233 Vector Graphics and Web Animation

Students will learn how to design vector graphics for animation, presentations, applications and Web sites using Macromedia Flash.

CIS 240 MicroSoft Client OS

CIS 244 Web Server Management

An in-depth study of the management of a web server including coverage of installation, role of the system administrator, TCP/IP in detail, managing Linux computers on a network, network server functions, network server applications, scripts, configuration, network troubleshooting, privacy and security, physical and local system security, kernel and networking security.

CIS 250 Advanced Web Design

Continued coverage of web design using more advanced tools such as Java Script, XML, CGI, or Perl. Prerequisites: CIS 115.

CIS 251 CIW Site Design

CIS 252 XML

This course will introduce students to Extensible Markup Language (XML). Concepts covered include objects, events, the document type definition, XLL and XSL.

CIS 253 PHP

CIS 254 CIW E-commerce Strategies and Practices

This course will prepare students to take the CIW E-commerce Strategies and Practices exam, the third level of exams needed for the Master CIW certification. During this course, students be taught the concepts of e-commerce and doing

business online, including technical concerns and differences from traditional commerce. Prerequisites: CIS 251: Site Design

CIS 267 Intermediate Networking I

This course focuses on the following advanced IP addressing techniques:

Variable Length Subnet Masking (VLSM)

Intermediate routing protocols

Command-line interface Configuration of switches Ethernet switching

Virtual LANs (VLANs)

Spanning Tree Protocol (STP)

VLAN Trunking Protocol (VTP).

The third of four courses leading to the Cisco Certified Network Associate (CCNA) certification.

Prerequisite: CIS 266.

CIS 268 Intermediate Networking II

This course focuses on the following advanced IP addressing techniques:

Network Address Translation (NAT)

Port Address Translation (PAT)

DHCP

WAN technology and terminology

PPP

ISDN

DDR

Frame Relay

Network management

Introduction to optical networking.

In addition, the student will prepare for taking the CCNA Exam. This is the fourth of four courses leading to the Cisco Certified Network Associate (CCNA) certification. Prerequisite: CIS 267.

CIS 270 Building Scalable Internetworks

This course covers advanced routing topics such as scalable network design, Classless Interdomain Routing, the OSPF

routing protocol, the EIGRP routing protocol, route optimization, the BGP protocol and network security.

CIS 271 Implementing Secure Converged WANs

This course covers remote access topics such as asynchronous dial-up connections, the PPP protocol, ISDN, demand-dial routing, X.25, Frame Relay and Network Address Translation.

CIS 272 Building Multilayer Switched Networks

This course covers switching topics such as VLANs, Spanning-Tree Protocol, Routing between VLANs, Multi-layer switching, Hot Standby Routing Protocol, Multi-casting and Restricting Network Access.

CIS 273 Optimizing Converged Networks

This course covers troubleshooting TCP, LAN Switches, VLANs, Frame Relay, ISDN, EIGRP, OSPF and BGP. Also covered are diagnostic tools and methods.

CIS 281/381 Project Management

The following individuals are leaders for this discipline. Those marked with an asterisk (*) are chairs.
